

REMARKS

Claim 31, 43, and 54 are pending in the application. Claims 55-111 have been added. Applicants received a Notice of Allowance for Claims 31, 43, and 54, and these claims remain in their allowed form. Applicants respectfully request reexamination and reconsideration of the pending and added claims.

New Claims

Applicants believe that new Claims 55-111 are allowable over the prior art of record, namely, U.S. Patent Nos. 5,748,103 ("Flach103") and 5,944,659 ("Flach659").

New independent Claims 72, 89, and 109 each call for a switch operable to link the physiologic data to the receiver and the identification module. New independent Claim 98 calls for the act of linking the physiologic data, the signature, and the identity to a switch. Flach103 and Flach659 do not teach or suggest such elements.

CONCLUSION

Applicants respectfully request entry of the present Amendment and allowance of the application. The undersigned is available for telephone consultation during normal business hours.

Respectfully submitted,

Julie A. Haut
